Daraju Group

Commercial Proposal - Helium™ Enterprise Middleware + Bulk Upload Options

Prepared by: WestMetro Limited (WML)
Validity: 30 Days
Currency: Nigerian Naira (₦), VAT Exclusive
Status: Confidential – For Daraju Internal Review Only

---

1. Executive Summary

Daraju operates five subsidiaries on a unified Orion ERP platform, supported by internal and/or third-party technical teams capable of extending the ERP to meet data readiness requirements.

WestMetro Limited (WML) proposes a multi-subsidiary deployment of **Helium™ Enterprise**, a secure and scalable compliance engine designed to handle all FIRS e-Invoicing obligations for Daraju.

The solution ensures:

- Centralized control for the Group
- Clean isolation per subsidiary
- High availability, hardened infrastructure, and audit-ready reporting
- One consolidated Enterprise platform serving all five entities

WML will also provide **Bulk Upload capabilities free of charge** if Daraju chooses the Helium Enterprise option.

A standalone Bulk Upload option remains available for subsidiaries that prefer a lightweight, file-based compliance route.

---

2. Understanding of Requirements

Daraju requires a compliance architecture that:

- Integrates cleanly with Orion ERP
- Supports all FIRS MBS submission flows
- Ensures zero data loss through robust queuing and acknowledgment handling
- Maintains strict separation of data across subsidiaries
- Provides compliance dashboards for Finance, IT, and Governance teams
- Offers predictable long-term maintenance and operational clarity

Daraju's internal technical capability means all **ERP extensions and data readiness activities** will be handled in-house, with WML providing specifications, validation rules, API guides, and support during integration.

3. Proposed Solution: Helium™ Enterprise (Group-Wide Deployment)

Helium™ Enterprise is a centralized middleware compliance engine deployed once and used by all subsidiaries. It manages invoice validation, transformation to FIRS-compliant structures, secure transmission, acknowledgments, audit logging, and multi-entity reporting.

Key Components

- 1 Central Kafka Queue
  High-throughput event bus for all outbound invoices from Orion.

- 1 Helium Edge Server (Daraju DMZ)
  Secure gateway that manages all communication with FIRS.

- 5 Hardened PostgreSQL Databases
  One dedicated DB per subsidiary for clean data isolation and compliance separation.

- 5 Compliance Dashboards
  Subsidiary-specific reporting, error tracking, acknowledgment history, and audit trails.

- 5 SMTP Configurations
  Enables each subsidiary to send compliance notifications using its own approved email identity.

- APP Access (1 Year)
  One year of Access-Point connectivity included.

- Bulk Upload (Free under Enterprise)
  Historical data, backlogs, or emergency submissions can be pushed through structured bulk upload templates without additional subscription cost.

4. Scope of Work

WestMetro Responsibilities

- Deploy Helium Enterprise stack (Kafka, Edge Server, Databases)
- Configure subsidiary profiles and routing rules
- Provide API specifications and mapping guides for Orion ERP
- Implement validation logic, IRN/QR generation, audit logging, retry rules
- Create and configure all five compliance dashboards
- Conduct UAT sessions with Daraju teams
- Provide documentation, templates, and operating procedures
- Offer 1-year APP access and advisory support

Daraju Responsibilities

- Implement ERP field exposure and data readiness
- Configure outbound queues or posting mechanisms from Orion
- Provide required network access and credentials
- Supply sample invoices for mapping and testing
- Nominate Finance, Tax, and IT representatives for UAT and approvals

5. Commercials

Option A – Helium Enterprise (Recommended)

Year 1 Costs

Item	Description	Amount (₦)
Helium™ Enterprise (All 5 Subsidiaries)	One enterprise-grade deployment with Kafka, Edge Server, 5 DBs, dashboards, SMTP configs, IRN/QR, validations, retries, audit log, API integration support.	32,000,000
Bulk Upload for All Subsidiaries	Included at no additional cost.	0
APP Access (1 Year)	Included.	0

Total Year 1 Investment: **₦32,000,000** (VAT Exclusive)

Ongoing (From Year 2 Onward)

Item	Amount (₦)
Annual Maintenance & Support	4,500,000 / year

Maintenance includes:

- Helium platform updates
- Schema adjustments for FIRS changes
- Dashboard tuning
- Incident support
- Security patches and continuous optimisation

Option B – Bulk Upload Only (Standalone)

Year 1 Costs

Item	Description	Amount (₦)
Bulk Upload Setup – Per Subsidiary	Template design, mapping, validations, dashboards, API setup for FIRS submission.	3,500,000
Total for 5 Subsidiaries	—	17,500,000

Ongoing (From Year 2 Onward)

Item	Amount (₦)
Monthly Support – Per Subsidiary	350,000 / month

This includes mapping updates, error resolution, FIRS rule changes, and continuous improvement.

---

6. Comparison Overview

Feature	Helium Enterprise	Bulk Upload Only
Architecture	Central Enterprise stack	File-based workflow

Feature	Helium Enterprise	Bulk Upload Only
Kafka Queue	✓ Included	✕
Helium Edge Server	✓ Included	✕
Hardened Databases	✓ 5 total	Optional
Compliance Dashboards	✓ 5	✓ 5
SMTP Configurations	✓ 5	✓ 5
APP Access	✓ 1 year	✕
Bulk Upload	✓ Free	✓ Paid
Year 1 Cost	₦32m (All Subsidiaries)	₦17.5m Total
Yearly Support	₦4.5m	₦350k/month/subsidiary

---

7. Timeline (Indicative 6–10 Weeks)

- **Week 1–2:** Requirements, mapping, and technical alignment
- **Week 3–4:** Environment setup (Kafka, Edge, DBs, dashboards)
- **Week 5–7:** Integration, configuration, and internal testing
- **Week 8:** UAT with Daraju teams
- **Week 9–10:** Go-live and hypercare

Exact timelines will be agreed once access is provided and the project is mobilized.

---

8. Payment Terms

- **60%** – Upon signing & mobilization
- **25%** – Upon UAT completion
- **15%** – Upon go-live

---

9. Proposal Validity

This proposal is valid for **30 days** from the date of issue.
