SIKA ENGINEERING

Commercial Proposal for **WestMetro Transforma™ Bulk Upload Service**

FIRS e-Invoicing (MBS) Compliance Enablement – Stop-Gap Solution
High-Volume Daily Upload Support (Up to 100 uploads/day)
Includes Free HSN Code Mapping

Prepared By: WestMetro Limited (WML)
Date: November 2025
Validity: 30 Days | **Currency:** Nigerian Naira (₦) | **VAT Exclusive**
Confidential – For Sika Engineering Internal Review Only

---

1. Executive Summary

WestMetro Limited (WML) proposes the deployment of **Transforma™**, a secure bulk-upload engine for **FIRS e-Invoicing (MBS)** compliance via WML's **Taxly™ Gateway**.

Given **Sika Engineering's low invoice volume and their need for a short-term, stop-gap compliance pathway**, Transforma™ is the ideal option. It enables Sika to:

- Upload and process invoices **instantly** without modifying any ERP
- Execute **up to 100 invoice uploads per day**
- Operate within a commercial allowance of **up to 50 invoices/day (≈1500 invoices/month)**
- Automatically validate all invoice fields against **FIRS UBL 3.0**
- Benefit from **free HSN Code Mapping** for invoices missing Harmonized System Codes

This ensures Sika Engineering becomes compliant **immediately**, while keeping future integration options open.

Total engagement value: **₦6,000,000 (VAT Exclusive)**
(Detailed breakdown in Section 4)

---

2. Scope of Work

1. Data Analysis & Mapping

WML will analyze Sika Engineering's invoice structure and align it with the **FIRS UBL 3.0 schema**, covering 26 mandatory + conditional fields.

2. Transformation Scripting

Custom scripts will be created to ensure:

- Schema validation
- Error detection
- Harmonized handling of mandatory tax fields
- **Automatic HSN Code Mapping (free)** for invoices missing HSN codes

3. Transforma™ Setup & Provisioning

A dedicated bulk-upload portal will be configured for Sika Engineering, enabling:

- **Up to 100 uploads per day**
- **50 invoice/day commercial allowance**
- Up to **1500 invoices/month** throughput

4. Testing & Validation

Upload tests and acknowledgment verifications will be executed via Taxly™.

5. Go-Live Support

WML will transition Sika to production and support the first weeks of use with monitoring and advisory.

---

3. Deliverables

Deliverable	Description	Responsible Party
Data Mapping Blueprint	Mapping of Sika invoice dataset → FIRS UBL 3.0	WML
Transformation Scripts	Custom validation + schema enforcement logic	WML
HSN Mapping (Free)	Automatic HSN assignment for invoices lacking HSN codes	WML
Test Upload Report	Validation results + FIRS acknowledgment	WML
Production Setup	Fully configured Transforma™ portal	WML
Go-Live Confirmation	Verified submission via Taxly™ Gateway	WML & Sika

---

4. Commercial Summary

Item	Description	Amount (₦)
Transforma™ SaaS Subscription	₦850,000 × 6 Months (50 invoices/day, 1500/month allowance)	**5,100,000**
Data Analysis, Mapping & Scripting	Includes free HSN Code Mapping	**900,000**
Total Engagement Value	Subscription + Implementation	**6,000,000**

VAT: 7.5% Exclusive

Payment Terms: 60% Mobilization | 25% After Validation | 15% at Go-Live

---

5. Next Steps

Step	Action	Responsibility
1	Proposal Review & Acceptance	**Sika Engineering**
2	Contract Signing & Mobilization Payment	**Sika / WML**
3	Kick-Off & Data Exchange	**WML / Sika**
4	Data Mapping & Validation Workshop	**WML (Lead)**
5	Configuration & Scripting Completion	**WML**
6	Client Testing & Sign-Off	**Sika**
7	Go-Live & Subscription Activation	**Sika / WML**
